DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 3, 2010 has been entered.

Election/Restrictions

2. Applicant's election of Group I, claims 10 and 12 in the reply filed on July 22, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-9 and 11 have withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 1-9 and 11 have been cancelled. Claims 1-9 and 11 have been previously withdrawn without traverse. Under these circumstances, when the application is otherwise ready for issue, the claims to the nonelected inventions elected without traverse, including nonelected species, may be canceled by an examiner's amendment, and the application passed to issue. See MPEP § 821.02.

Allowable Subject Matter

4. Claims 10, 12 and 13 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record are held to reasonably teach, suggest or render obvious the solid electrolyte of claims 10 and 13 or the solid state battery of claim 12 including the electrolyte of claim 10.

Upon further consideration, and in light of the teachings of the newly cited Lee publication, the prior art of record is not held to reasonably teach of the claimed composition including the stoichiometric ratios of lithium, phosphorus, silicon, oxygen and nitrogen as recited in claim 10. Lee provides evidence that use of a precursor material of Li_2SiO_4 only appears to generate compositions wherein lithium is less than 3. Thus the prior art, including KR '618, of record fails to teach of lithium in the range claimed. Whitacre teaches that it is known to fabricate electrolyte glass from combinations of Li_4SiO_4 and Li_3PO_4 but fail to teach of the composition having the same element ratio in combination with the presence of nitrogen as required in the claimed invention.

Art Unit: 1795

Note that Applicant's arguments directed to Li_4SiO_3 appear to be a typographical error since the specification and prior art appears to show that the precursor composition which generates the higher amount of lithium including the claimed range is lithium orthosilicate or Li_4SiO_4 .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregg Cantelmo whose telephone number is 571-272-1283. The examiner can normally be reached on Monday to Thursday, 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pat Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
